

Product Name: Phone Watch - 1.4" TFT

Model Number: CVSCX-9301

Three band (900MHz, 1800MHz, 1900MHz) precision molded cellphone watch with touchscreen and full numeric keypad on the face of the watch. This sharp new mobilephone watch has a high quality touchscreen LCD display and a built-in numeric keypad for quick dialing and texting while on the go.

Have you been told that mobile phone watches are nothing but simple gadgets? Well, now you can prove everyone wrong with this new model touchscreen + keypad style cell phone. You can make a quick call and leave everyone flat faced with the simple way you do it and at the same time show them a movie or start playing your favorite tunes.

You don't need to show off to your friends and colleagues? Then use this as it is meant to be, pair it to the included bluetooth earpiece (or included wired earphones with MIC) to start making/receiving calls and listening to music. Have some time to kill during your daily commute? Then use this baby to tune into your favorite radio station, watch videos, or even surf the internet while you are riding on the metro.

Let's not forget, this is still a fully functioning digital watch with time, date and day display with programmable alarms and to do lists for keeping you on schedule and in style.

Proudly brought to you by the leaders in wholesale electronics from overseas, Evantics.com.

At a Glance...
